

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Claim 1. (currently amended) A molding composition consisting of

- A) 40 - 95 parts by weight (in relation to 100 parts by weight of the total composition) of aromatic homopolycarbonate having weight average molecular weight of 10000 to 200000 and/or polyester carbonate
- B) 10-35 parts by weight (in relation to 100 parts by weight of the total composition) of a rubber free (co)polymer of at least one monomer selected from the group consisting of vinyl aromatics, vinyl cyanides, anhydrides of unsaturated carboxylic acids and derivatives imides of unsaturated carboxylic acids,
- C) 1 - 25 parts by weight (in relation to 100 parts by weight of the total composition) of silicone acrylate graft rubber and
- D) [[0.4 – 40]] 9.85 to 30 parts by weight (in relation to 100 parts by weight of the total composition) of glass fibers and optionally
- E) at least one member selected from the group consisting of lubricants, mold release agents, nucleating agents, dyes and pigments.

Claim 2. (original). The composition according to Claim 1, in which component C is prepared by graft polymerization of aromatic alkenyl compounds and a vinylcyanide onto a composite rubber that contains a polyorganosiloxane rubber component and a polyalkyl(meth)acrylate.

Claim 3. (cancelled).

Claim 4. (currently amended). The composition according to Claim 1, wherein component B is a copolymer of

B.1 from 50 to 99 parts by weight (in relation to 100 parts by weight of B) of vinyl aromatics and

B.2 from 1 to 50 parts by weight (in relation to 100 parts by weight of B) of a member selected from the group consisting of vinyl cyanides, anhydrides of unsaturated carboxylic acids and imides derivatives of unsaturated carboxylic acids.

Claim 5 (currently amended). The composition according to Claim 1 wherein the amount of glass fibers is [[1 to 30]] 9.85 to 20 parts by weight.

Claim 6 (cancelled).

Claim 7 (original). A method of using the composition according to Claim 1 comprising molding an article.

Claim 8 (original). The article prepared by the method of Claim 7.

Claim 9 (original). A molded article comprising the composition of Claim 1.

Claim 10 (cancelled).

Claim 11 (new) A molding composition consisting of

A) 40 - 95 parts by weight (in relation to 100 parts by weight of the total composition) of aromatic homopolycarbonate having weight average molecular weight of 10000 to 200000 and/or polyester carbonate

B) 10-35 parts by weight (in relation to 100 parts by weight of the total

composition) of a rubber free copolymer of

- B.1 50 to 99 parts by weight (in relation to 100 parts by weight of
 - B) of vinyl aromatics and
- B.2 1 to 50 parts by weight (in relation to 100 parts by weight of
 - B) of a member selected from the group consisting of vinyl cyanides, anhydrides of unsaturated carboxylic acids and imides of unsaturated carboxylic acids.

C) 1 - 25 parts by weight (in relation to 100 parts by weight of the total composition) of silicone acrylate graft rubber prepared by graft polymerization of at least one aromatic alkenyl compound and vinylcyanide onto a composite rubber containing polyorganosiloxane rubber component and polyalkyl(meth)acrylate component, and

D) 9.85 to 30 parts by weight (in relation to 100 parts by weight of the total composition) of glass fibers and optionally

E) at least one member selected from the group consisting of lubricants, mold release agents, nucleating agents, dyes and pigments.
